Front-End Web Developer

From the past couple of years, I have been learning the Front-end development via university and online and now I am fully ready to gain experience in the real world by working with a company or an organization.

For accomplishments I won a competition in my university by making a website that takes the name of topic and make notes for student which also includes manual notes, edit, delete, pdf analyzer this helps in space management as we don't need to worry about space and all the data is in database saved for backup.

EDUCATION

ADP in Computer Science

Riphah International Collage • Pakistan Attock • GPA: 3.79 • 12/2023 - 08/2025

I won a competition held in our collage locally by students.

PROJECTS

NotesNest • 08/2025 - 08/2025

A project I made using React js and firebase for students to make notes using grok AI's API with this they can create, edit and delete notes also they can create manual notes by them self and also there is a chat bot with which we can ask about any pdf we can understand and ask questions simply select the pdf and ask questions and I have some other plans for it in the future.

Typing Speed Test • 05/2025 - 05/2025

One of my first Projects made by using React js where it gives user a phrase and he/she has to write the statement and lastly the time is calculated and result is shown in words per minutes.

VOLUNTEERING & LEADERSHIP

Friends

I helped some friends to make their project with them for the final project for thinking an idea, fixing bugs and preparing the presentation.
